## Accomplishments:

As a web design instructor, I have become very interested in the field of web accessibility, recognizing this as a powerful tool to make websites work much better.

I earned the Certified Professional in Accessibility Core Concepts certification in December of 2018. In 2019 I worked for American Foundation for the Blind doing usability testing on websites and apps and working with people who are blind or visually impaired. I am looking for opportunities to provide training in accessibility to developers.
